**Cachematrix Expands Global Presence with New London Office**

Denver, CO – September 1, 2015 – Cachematrix, the world’s leading financial technology provider of institutional liquidity platforms, today announced that it has expanded its global presence to include an office in London. The new office, based out of Canary Wharf, opens this month and will serve as a hub for European operational and technology support.

Cachematrix's decision to open a UK office was driven by our growth with banking clients in Europe and the necessity to be immersed in the FinTech revolution taking place locally in London.

"We understand the importance of being physically present with our financial institution partners and corporate investors. Leveraging our relationships to drive innovation is a cornerstone of our strategy," says Ryan Kipp, Global Head - Sales and Product Management at Cachematrix.

"Our new UK presence is the next step in our expansion plan to have a global support model that follows our worldwide clientele," says Matt Crooks, Chief Information Officer at Cachematrix. "Customer support, relationship management and technology expertise has always been key to our success for both our client retention and acquisition strategies. This move further strengthens our service model and ensures worldwide customer success."

The Cachematrix London office opened on September 2, 2015 at 40 Bank Street in Canary Wharf, London.

**About Cachematrix Holdings, LLC**

Cachematrix is the leading software as a service (SaaS) provider of institutional trading systems for banks and financial institutions worldwide. Cachematrix enables banks and other financial services firms the ability to offer its corporate clients online access to a full suite of liquidity products through a convenient, single-source platform for managing assets.
