

Cachematrix adds Chief Operating Officer

Denver, CO – March 13, 2018 - Cachematrix is pleased to share that Cindy Bernhardt will join Cachematrix in the newly-created role of Chief Operating Officer. Cindy has been critical in helping drive Cachematrix's success following the acquisition by BlackRock and she will seek to further bring the power of BlackRock to Cachematrix and the power of Cachematrix to BlackRock in her new capacity.

Cindy joined BlackRock from the Barclays Global Investors (BGI) acquisition in 2009 and has valuable experiences over her career that positions her well for this role. Cindy knows and understands the cash markets given her experience as a portfolio manager across multiple currencies, she is an experienced people manager having led diverse teams, and she has first-hand knowledge of acclimating to the BlackRock culture. Additionally, Cindy's ability to manage competing priorities and resources, and her aptitude for making tough business decisions makes her the appropriate choice for the role of COO.

"I am very excited to welcome Cindy to the Cachematrix team," said David Agostine, CEO of Cachematrix. "This increased depth managing our business will bring additional strength to our leadership team and will enhance our ability to engage more deeply with existing and prospective clients worldwide."
